## About this price list

In this price list a large portion of the Dataflex product portfolio 2012 can be found. The price list has been separated per product range and product series, also you can search by product number or SKU in the product number reference list, if you are familiar with our product numbers.

At the time of printing, this price list was up to date but, as you know, Dataflex is constantly developing new products. We therefore advise you to visit our website regularly for the latest developments and updates.

Supplementary to this price list our website is filled with very detailed product specifications such as datasheets, 3D pdf's, technical bullet points and much more. We strongly advise you to consult the website when additional product information is required.

You can immediately jump to the product ranges on our website by scanning the QR code with your smart phone.

## QR code?

QR codes (Quick Response) are similar in function to a barcode but contain much more information. You can use any barcode/QR scanner app for your smartphone to read the QR's. The QR codes in this pricelist immediately take you to same the product range page on the Dataflex website. Making it a lot faster and easier to find additional product information. Give it a try!

We make every effort to ensure that the data we publish is correct and up-to-date, but inaccuracies do occur and prices, specifications can change. If in doubt, we recommend that before making a purchasing decision you check with us.

With Best Regards,

Dataflex

# ViewMaster

## M6

The ViewMaster M5 series is praised for its precision and quality. The new M6 series will uphold that reputation, for it will provide a parallel mechanism and unique features even more sophisticated than the M5's. This parallel arm is designed to be as ergonomically sound as possible for multiple user workplaces. The arm is easy to adjust in height with less effort and also without having to mend the screen. Therefore the M6 is a perfect solution for a higher standard in ergonomics.

**M5**

Our ViewMaster M5 series of gas assisted LCD arms, are manufactured to the highest standards of design, finish and precision. They are made of strong, die-cast aluminium and are built to last a life time. The main structure contains a small swivelling arm holding the ball joint attachment which renders complete 3-dimensional mobility to the VESA MIS-D (75/100) mount. This part connects the screen to the arm. Providing a max. load capacity of 12kg, it outranks all competition. All models in these series can be obtained in charcoal or silver colour and in either a desk clamp/base or wall mount version. The M5 series is used worldwide in healthcare, office and IT environments. All M5 arms provide an integrated and concealed cable management feature.

**M3**

Our ViewMaster M3 series offer its users the best multiple-screen solutions available. They were designed especially as a high-end application for IT, Designer and Monitoring workstations. Combining long-wings, short-wings, connection kits, different pole heights and different desk mounting options will quickly provide the specific arrangement you require, occupying only minimal desk-space. M3 series offer mounting possibilities for up to 8 flat screen monitors and because of M3's modular design, a customized monitor arrangement can be created in no time. The die-cast aluminium horizontal wings and pivots, together with the sturdy steel posts were developed to combine into an ideal, perfectly designed workspace. All M3 models are equipped with an integrated cable management system.

## M-Modular

The M stands for Modular, indicating that the various products in this category are building elements, with which you can create precisely that customized solution that you need. It also enables users to upgrade or adapt their configuration according to their changed requirements. For instance, if your original ViewMaster M5 configuration offers insufficient depth adjustability, simply order and install an extension.

## ViewLite

The ViewLite monitor arm range was created by combining simplicity and attention to detail in one sustainable concept. Using aluminium as the main material, the monitor arms are light, sustainable and recyclable. The diversity of mounting capabilities makes it possible to free up valuable desk space and provide the user with an ergonomic work place. The modular composition of the ViewLite range allows a mounting solution for nearly every situation.

56.092	silver	€ 49,00

**PC SOLUTIONS**  
by Dataflex

**Katame**

Katame (pronounced KA-TA-MAY) is Japanese for hold or grip (a common concept in Judo). The Katame CPU holders will literally hold the PC in a never dwindling lock. Suspended underneath the desktop it is fully enclosing the sides of the CPU. The Katame CPU holder is made of environment friendly recycled ABS. The CPU holders are capable of holding computers of different sizes through adjustable sliding parts. The Katame's can be mounted both vertically and horizontally and will install easily underneath any desktop (with the exception of glass). The mounting brackets come in two sizes, low and high, providing easy installation around all different types of support beams underneath the desktop. By using ABS for the production of these CPU holders, an amazingly sustainable design was created. The Katame's are available in white and black.

**Katame CPU Holder Small 100/103**

Maximum weight capacity: 30kg  
Adjustable height 240-390mm  
Adjustable width 96-147mm

Max. weight capacity of 30kg

DFX NR.	COLOUR	SALES PRICE
35.010	white	€ 15,00
35.013	black	€ 15,00

**CPU Holders**

The Dataflex CPU solutions do more than just mount CPU's. When using a CPU holder or stand, the CPU is no longer directly on the floor, where it is vulnerable to dust, especially the chipset and hard disk drive(s). When placing the computer into a Dataflex CPU solution the amount of dust it will gather inside the case, is drastically less than before. The area around the computer is also easier to clean and thus easier to maintain a more dust free environment for the CPU. Chances of spilling liquids onto, or bumping into the CPU are also smaller. The CPU Holders even work theft-retardant. Especially the Top Grip Security models, which are completely anti-theft, lockable CPU Holders. All good reasons to choose Dataflex CPU Solutions to protect precious hardware.

**Top Grip CPU Holder 312/313**

Fixed, maximum weight capacity: 20kg

**Protection Cases**

Computers are vulnerable devices. They are vulnerable to dust, shocks, static electricity, heat and fluids. When a computer is placed in a Dataflex CPU Protection Case, most of the above evils no longer pose a threat. Also, the constant buzzing noise generated by the fans inside the computer is reduced drastically. Thus the Protection Cases serve a double purpose. Creating a more comfortable and safe environment for user and computer.

**PC Security**

Dataflex offers a whole range of security products. All intended to keep valuable hardware secure and more difficult to steal. Insurance companies often do not compensate any losses caused by theft, when the stolen equipment was not secured in any way. By attaching one of the Dataflex PC Security products, the hardware is less susceptible to theft and is easier to claim if actually stolen.

# DESK ERGONOMICS

## LCD Monitor Stands

Almost every single monitor one can buy, does not come with a stand, high enough to raise the monitor to the proper level. Eye-level. Dataflex is the founder when it comes to using acrylic material to build monitor stands. Acrylic is both strong and appealing and because of its transparency, only seems to take up very little desk space. We have designed many different types of stands, but why not one or two? Because Dataflex realizes that every problem deserves a solution of its own. All users are unique, as are their desks, chairs, computers and monitors. The monitor stands are all designed to fulfill their own designated solution, each stand having its own unique capabilities and applications.

### LCD Monitor Stand FH 550

## Notebook Stands

Notebook stands are designed to raise the notebooks to the user's eye-level. This will result in a far better working posture. The user can sit more upright and does not have to bend forward while typing. All above will reduce the tensions on neck, shoulders, arms and wrists, making it more pleasant to work with notebooks, thus aiding in the prevention of RSI or CANS.

**ErgoNote Notebook Stand HA 450/460**

## Miscellaneous

A perfect workplace is not achieved just by installing a fast computer, a good desk and a comfortable chair. It's the minor details that turn a good workplace into the best workplace. The footrest for instance gives support to the lower back muscles, making it much easier to sit up straight behind ones desk. Please take a look at all miscellaneous Dataflex accessories, designed for working with greater ease, generating higher productivity and decreasing overall fatigue for their users.

## TVmotions®

TVmotions® is a revolutionary wall bracket that enables users to swivel and tilt their flat screen television to any desired position. This ground-breaking product measures only 60 (!)mm in depth when folded in its HOME position. Mounting a flat screen TV as close to the wall as possible, no longer means losing the flexibility to be able to watch TV from any angle in the room. This compact package finally allows users to experience the dynamic viewing solution only Dataflex can offer. The TVmotions® is suitable for almost every LCD/Plasma flat screen television. The ease of installation and use makes the TVmotions® not only very attractive for airports, bars, offices and hotels but for home owners as well. The TVmotions® is available as a quad motorized electrical version with infrared remote control or manual version. Both versions have TÜV/GS, CE approval, RoHS conformity and are patented worldwide.

54.502	black	€ 39,00

## AV Centers

With this generation of Audiovisual presentation centres, we offer an esthetical and safe solution for storing LCD/Plasma screens with presentation purposes. It's specific design is solely meant for flat screen televisions, resulting in a very compact cabinet. The bottom has ample room for CD/DVD/HDD/Blu-ray/HD-DVD player and space for CD/DVD cases. There are three different sizes in five different colours of wood grain and two different colours for the mobile rigid steel frame. This to create your ideal version. Cables can be stored and concealed inside the slide covers of the steel legs. The cabinet is height adjustable opposed to the frame to realise an ideal viewing height. The doors can be opened under a 270° angle and, when closed, can be locked by a cylinder lock. The four castors are equipped with a skid proof tread of which two are lockable. Ventilation holes have been added at the top of the back panel to allow sufficient cooling.

**Acoustic**

These Acoustic Hoods and matching stands provide a great solution to suppress noise created by matrix printers or other loud office machines. By using acoustical foam in the inside of the hoods, high pitch noise is cancelled. Our acoustic hoods have a built-in low-noise fan, a 220 Volt power outlet to which the printer can be connected and many other useful features.

**PRX Acoustic Hood**

Check our matrix compatibility list for the correct hood

**Toner Dust**

The Dataflex LTX series Laser printer hoods are a 3 in 1 solution. The hoods protect man and machine. Protecting the user from harmful toner and fine dust particles through a special filter, and reducing noise hindrance in the workplace by absorbing this noise inside the hood using acoustical foam. The LTX hoods also keep dust out, therefore protecting the printer and preventing the over saturation of the toner and fine dust filter with 'normal' dust. Noise reduction, toner/fine dust particle filtration inside the hood, dust filtration outside the hood. Three in one.

**LTX Laser Printer Hood**
